

Fasal Seva

Empowering Agriculture

The Problem

1. Information Gap: Farmers lack real-time access to critical market data and government schemes.
2. Supply Chain Inefficiency: Middlemen reduce farmer profits and increase consumer prices.
3. Resource Waste: Poor predictability leads to crop spoilage and improper resource utilization.

The Solution: Fasal Seva

- AI-Powered Insights: Real-time crop advisory and weather alerts.
- Direct Market Linkage: Connects farmers directly to buyers, bypassing intermediaries.
- Digital Mandi: A transparent platform for fair pricing and secure transactions.

Technology Stack

- Frontend: React Native for mobile, React for web dashboard.
- Backend: Python/Django for robust API handling.
- AI/ML: TensorFlow for crop disease detection and price prediction models.
- Infrastructure: AWS Cloud for scalability and reliability.

Our Vision

To build a sustainable agricultural ecosystem where technology bridges the gap between effort and prosperity.

Target: Empowering 10 million farmers by 2030.
